## **PROFESSIONAL EXPERIENCE**

**[1] Designation:** Software Tester

**Company:** Slice Carving Technology (Jan 2024 - Present).

### **Project 1**

**Client** : Edusama (online School)

**Environment** : QA Environment

**Role** : Functional Tester

A learning management system helps organizations deliver online classes and training materials to students, recorded classes and workers quickly and efficiently. After completing the course, the employee can complete the associated quizzes or tests. If they pass those tests, they'll earn a certification that proves they're fully trained and have the product knowledge required for their job. The LMS keeps records of each person who completes the course. Platform administrators can access those records to see who has passed the course and who might need additional help or further training.

#### **Responsibilities:**

- Understanding and analysing the requirements for Web Application.
- Developing a test plan outlining the testing approach, test scope, test schedule, and resource requirements.
- Creating detailed test cases covering various aspects of the user roles like Super Admin, Admin, Manager, Teacher, Student, Parent, Branch, Subject, Virtual Classroom and Zoom Link Integration
- Executing test cases manually to verify the functionality of the web application.
- Validating both Functional and Non Functional Testing.
- Error Reporting.
- Performing UI and UX Testing.
- Conducting Ad Hoc Testing to discover potential issues not covered by scripted test cases.
- Maintaining Test Documentation.
- Providing Feedback on UI improvements for optimizing the testing process.
- Performing Smoke Testing & Compliance Testing.
- Collaborating with developers, product managers and other members to understand the system architecture and functionalities.
- Working to deliver reliable and user-friendly web applications for managing solar heat and cooling systems.

**Designation:** Software Tester.

**Company:** Plan Point Support Services (Dec 2022- Jan 2024)
